

Frontend

Posted by Chelena - 2009/01/04 14:49

Hi thank you for a usable component.

I am new to JoomlaWatch so here is my questions:

1. I would like to display stats on frontend only to registered users but capture all visitors, and would like to place the stats on one page only for registered users.
2. Yesterday I surfed the internet as a bot, my IP displays my location somewhere in the sea, I noticed the change in my IP thought JoomlaWatch got it wrong, I checked with a third party that confirmed wrong IP, strangely I had very very fast internet speeds compared to other days? Today back to normal?

Regards

=====
