

How to describe page flows in a lengthy XML format

Posted by user2399 - 2010/02/19 06:35

I'm finding it very difficult to elaborately describe the page flows in a lengthy XML format which is very complex , does any software provide XML transformation to mould results suitable for user s to view?

Check out how it is with JSF navigation. h [ttp://www.roseindia.net/jsf/JSFStaticNavigation.shtml](http://www.roseindia.net/jsf/JSFStaticNavigation.shtml). Even quite complex page navigation can be described this way. There are also eclipse plugins to visualize this.
