

## **JW 1.2.6 & 1.2.5 w/J1.5.6**

Posted by user976 - 2008/08/19 06:38

---

Trying to install either the component or the module on a freshly installed J1.5.6 produces the following error message when I browse to and try to upload either the unpacked com\_joomlawatch.zip or mod\_joomlawatch.zip file:

Unable to find install package

Help!
