

## Language problem!?

Posted by user2313 - 2009/12/26 14:52

---

Hi, I was setup last Joomla watch everything is ok. When I want to change language from setting (turkish), stats nothing show (loading stats..) when I was change again (english) stats stats showing rightly.

What can I do for this problem?

Hello,  
I've tested it with the 1.2.10\_01-dev version (in the download section) and it works without any problem. Can you try to install that version too?

Thanks,

Matto

Please create a temporary account for me and send it to me via an email. You also might swich on the debug mode in config.php \_JW\_DEBUG to 1 and see whether it displays the cause of this problem
