

## module not published during 1 month

Posted by user1323 - 2008/09/26 13:38

---

Hello.

great component and great frontend module.

I have a question about the frontend module.

During the first month, I would like not published the module because I would like to display some significant counters and at least 5-6 countries.

I understood if I don't publish the module, the visits will not take in charge.

My question is : if I publish the module but in a no existant position of my template, the visits will be take in charge ?

(After 1 month, I put the module on an existant position and the counters and countries will be displayed.)

Thanks a lot for your answer.

regards

No.

You can switch off the frontend stats in the settings, and set the icon to BLANK.
