

No countries?

Posted by The_Ace - 2008/09/11 02:10

Tonight I have installed 2 JoomlaWatches 1.2.7 on two site with different hosts. Both sites are Joomla 1.5.7.

One site shows the country info(Flags) and the other doesn't. Both have the same joomla and joomlawatch config.

Any ideas?

PS: I am referring to the backend.
