

no data in admin

Posted by user2778 - 2010/09/17 20:52

no data is shown in admin. when I changed

```
# define('JOOMLAWATCH_LIVE_SITE','/');
```

to:

```
define('JOOMLAWATCH_LIVE_SITE','wwwproweblabs.com/core');
```

everything is gone away..

The image without any changing above.

<http://i56.tinypic.com/2my19gm.png>

"mod_joomlawatch_users.zip" and "mod_joomlawatch_visitors.zip" not working too..

<http://i54.tinypic.com/dzv6eg.png>

What must I do?

MY WEBSITE IS:

ProWebLabs

No admin, no developer, no advise!!!

Please write something.. If you do not give any advise, I will delete extension.

Hi,

1. You have your live site name wrong:

```
define('JOOMLAWATCH_LIVE_SITE','wwwproweblabs.com/core');
```

should be:

define('JOOMLAWATCH_LIVE_SITE','www .proweblabs.com/core'); (without space between www and .)

2. It seems that you don't have the JoomlaWatch agent published in frontend.

Re:no data in admin

Posted by user2782 - 2010/09/20 17:25

I used some different ways, such as:

'w*ww.proweblabs.com/core/'

'http://w*ww.proweblabs.com/core/'

'http://w*ww.proweblabs.com/core'

'w*ww.proweblabs.com/core'

"w*ww.proweblabs.com/core/"

"http://w*ww.proweblabs.com/core/"

"http://w*ww.proweblabs.com/core"

"w*ww.proweblabs.com/core"

But these are only works without any visitor numbers:

'http://w*ww.proweblabs.com/core/'

'http://w*ww.proweblabs.com/core/"

But I have same problem. Not shown any results in admin or frontend.

Any wrong codes in config???

PLEASE CHECK CODES IN CONGIG.PHP

/* LIVE SITE:

* (remove //) of the following line to override the live site setting:

*/

```
define('JOOMLAWATCH_LIVE_SITE','http://w*ww.proweblabs.com/core/');
```

```
define('JOOMLAWATCH_VERSION', "1.2.12");
```

```
define('JOOMLAWATCH_SERVER_DAYLIGHT_SAVING', 0);
```

```
define('JOOMLAWATCH_DEBUG', 0);
```

```
define('JOOMLAWATCH_STATS_MAX_ROWS', '20');
define('TYPE_JOOMLAWATCH_STATS_MAX_ROWS', "number");

define('JOOMLAWATCH_STATS_IP_HITS', '20');
define('TYPE_JOOMLAWATCH_STATS_IP_HITS', "number");

define('JOOMLAWATCH_STATS_URL_HITS', '20');
define('TYPE_JOOMLAWATCH_STATS_URL_HITS', "number");

define('JOOMLAWATCH_IGNORE_IP', ' ');
define('TYPE_JOOMLAWATCH_IGNORE_IP', "text");

define('JOOMLAWATCH_IGNORE_USER', ' ');
define('TYPE_JOOMLAWATCH_IGNORE_USER', "text");

define('JOOMLAWATCH_UPDATE_TIME_VISITS', "2000");
define('TYPE_JOOMLAWATCH_UPDATE_TIME_VISITS', "number");

define('JOOMLAWATCH_UPDATE_TIME_STATS', "4000");
define('TYPE_JOOMLAWATCH_UPDATE_TIME_STATS', "number");
```

Use those which you've written work for you. You didn't answer my question: I asked whether you have the JoomlaWatch agent enabled in frontend and it shows an icon of JoomlaWatch. This is the essential part which gathers the visits, without this you cannot see anything. Later, you can hide this icon from settings.

Everything is already enabled..

I checked your website proweblabs.com/core/
and you don't have mod_joomlawatch_agent in fontend. Even though you see it published in the

modules, it is not in the frontend, because you set some non-existing position. As I wrote, YOU MUST SEE THE JOOMLAWATCH ICON in the frontend.

Please try to change the "Position: " in JoomlaWatch agent module settings to something else. Left, Bottom, anything that you see the JW icon. Your position which is set there doesn't exist in your template.

Dear friend, I think it is ok :) I replaced JoomWatch Agent module in admin to the "Left" column. I saw icon, and checked backend.. I see statistics..

Thank you very much. You're best..

Best wishes.

Bulent
