

Not logging IPS

Posted by RSprinkel - 2009/08/17 20:25

Hi folks,

AWESOME Component first off.

What I am searching for and did search various terms and came up with nothing relevant to my question.

But I want to know how I can hide my IP From showing up in the logs? Basically I am in and out of my site various times of the day and don't need a long list of pages I personally have been at in the log section.

How do I disable that part?

Thank you for your time and understanding.

I also would like to know how to achieve this. Did you find a solution?

Nigel
