

Problem with download

Posted by user2862 - 2010/11/22 10:08

When I try to download JoomlaWatch 1.2.12 and other files after a click on the link I am send to url:

<http://www.codegravity.com/component/remository/0,func=fileinfo/1,id=29/2,func=fileinfo/3,id=29/?0=func=fileinfo>

And get page with error text:

"Illegal variable _files or _env or _get or _post or _cookie or _server or _session or globals passed to script."

The same problem is with the other files to download.
