

some bots not listed as bots

Posted by user2237 - 2009/11/10 21:58

Hi,

I see several hits that must be bots because they go through the entire site spending one second on each page and no browser icon shows up next to their IP address.

These hits are not listed under the Bots list but appear in the upper portion of the stats page mixed in with real visitors.

Any ideas on why this is?

Thank you
