

## What does STATS\_IP\_HITS mean exactly?

Posted by user2899 - 2010/12/07 14:04

---

Can someone please explain what is meant by this setting exactly?

STATS\_IP\_HITS (default: 20) - All IP addresses that have less hits in previous days than this value will be deleted from IP history.

Thank you very much for any help.

---

That you don't want to keep all IP addresses in database (if enabled), only top 20 will appear in statistics.
