

What does STATS_IP_HITS mean exactly?

Posted by tshrader - 2010/12/07 14:04

Can someone please explain what is meant by this setting exactly?

STATS_IP_HITS (default: 20) - All IP addresses that have less hits in previous days than this value will be deleted from IP history.

Thank you very much for any help.

That you don't want to keep all IP addresses in database (if enabled), only top 20 will appear in statistics.
